

AMP Superseal

All AMP Superseal connectors are packaged in a kit form which consist of everything needed for one side of a connection ie. housing, terminals and seals.

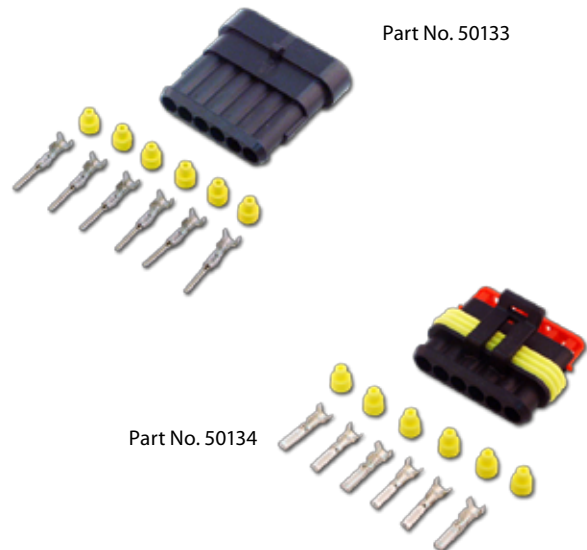

The housing contains a secondary lock to ensure the contact is properly located in the housing and prevents the terminal from being pushed out during connection. The secondary lock will not close if the contacts don't engage properly.

The connection is rated at IP67 when used correctly. Sealing blanks are available for sealing unused contacts in housings.

Superseal Connector Kits

Part No.	No. of Circuits	Housing Type	Pack Qty
50123	1	socket	1
50124	1	plug	1
50125	2	socket	1
50126	2	plug	1
50127	3	socket	1
50128	3	plug	1
50129	4	socket	1
50130	4	plug	1
50131	5	socket	1
50132	5	plug	1
50133	6	socket	1
50134	6	plug	1

Kits contain housing, seals and terminals.

Components

Part No.	Description	Pack Qty	Fig
